

GS Composite Carbon Gangways

Indispensable accessory for all nautical enthusiasts. Our passarelles are constructed from layers of carbon fibers and hi-tech epoxy filled with foam. Due to the technology of production and the materials used, the gangway is light, incredible sturdy and durable!

Make the end to risky slips

The passarelles are coated with anti-slippery rubber foil that prevents slips even when wet.

Safely to your boat at night

Possibility of lightening with Light Emitting Diodes and glass fiber.

Simple storage

When not used, simply store in a special bag you can hang on the yacht's fence.

Many design styles, colors and with yacht names available.

Sizes:

220 x 35 cm or 260 x 35 cm
